Part I

# Demonstration

## 1 Section

You can easily use the basic maths number sets  $\mathbb{N}$ ,  $\mathbb{Z}$ ,  $\mathbb{Q}$ ,  $\mathbb{R}$ ,  $\mathbb{I}$ ,  $\mathbb{C}$  by typing `\[letter]` and the join symbols  $\bowtie$  $\bowtie$   $\bowtie$   $\bowtie$  by typing `\[jointype]`.

`\separate{[space]}` adds space between paragraphs and removes indents.

When writing papers can easily create:

- **Definition 0.0.1:** Defining word here.
- **Example 0.0.1:** Example here.
- **Conjecture 0.0.1:** Conjecture here.
- **Custom Type 0.0.1:** Entry text here.
- *Proof:* Proof goes here (auto QED symbol  $\rightarrow$ ).

□

- **Theorem 0.0.1:** Theorem here.

*Proof:* Proof here.

□

- **Lemma 0.0.1:** Lemma here.

*Proof:* Proof here.

□

---

**Algorithm 1** Algorithm Caption

---

**Input:** The algorithm’s input  
**Output:** The algorithm’s output  
The algorithm’s code

---

Figure 1: Some Dogs

| Column 1 | Column 2 | Column 3 |
|----------|----------|----------|
| Cell 1   | Cell 2   | Cell 3   |
| Cell 4   | Cell 5   | Cell 6   |
| Cell 7   | Cell 8   | Cell 9   |

Table 1: The table's caption

See the custom title page, header, and footer.
